

QSITE support for all educators

educators of today, creating tomorrow

QSITE is a state-wide organisation with:
active regional chapters incorporating educators from **State, Independent** and **Catholic** schools, at **early, middle** and **senior** learning phases.

Many QSITE members work within educational governing bodies and service wider educational communities.

Daily online conversations among the QSITE network reveal education's true ICT integration needs and support educators through constant collaboration.

Join the network that explores every opportunity ICTs bring to the education profession.... to you, your students, your colleagues and your school.

Become a QSITE member today and put the QSITE network and learning communities to work ...for you, your students, your colleagues and your school.

QSITE supports school leaders and administrators

QSITE is a valuable resource for school managers and executives facing a variety of ICT challenges - from accessing and implementing educational software to database management, website development and school networking.... QSITE members have a vast bank of experience; skills and knowledge to help inform these ICT and school management decisions. QSITE is made up of institutions and individuals who know the value of collaboration - why go it alone?

QSITE is a vital resource for in-school ICT leaders

The QSITE membership is dominated by important individuals who provide timely, customised assistance to Queensland educators everyday, both to the QSITE network and to their own work colleagues. QSITE calls these people ICT leaders and they can be found in a variety of roles - from recognised ICT Directors to individual teachers with a passion for ICTs. ICT leaders are often called upon to inform school management decisions. Giving these key professionals access to a network of professionals facing the same daily decisions and dilemmas is invaluable in this important, and sometimes unofficial, role. It is often ICT leaders who most benefit from QSITE services and support.

ICT educators have 24 hour access to the QSITE network

For QSITE, ICT teachers are the backbone of ICT in education - the first professionals to embrace technology and its rapid changes for the benefit of Queensland students. ICT Teachers were also the first professionals to embrace QSITE and form the foundations of our knowledge-network. QSITE has a tradition of support for ICT educators including tailored professional development; active representation in curriculum and policy development debates; and online collaboration for daily problem solving.

Classroom teachers need QSITE learning communities

Queensland teachers face increasing pressure to build their ICT integration skills. But ICT integration is not as simple as providing technology to teachers: professional support networks are vital to develop meaningful learning results for students. The Education Queensland Pedagogical ICT License Scheme and other pressures to embed ICT into all schooling levels and curriculum areas are a reality. There is more reason than ever for classroom teachers to access QSITE's tailored learning communities as they face their individual ICT integration challenges.

Queensland students and their parents EXPECT QSITE

ICT integration is a recognised part of our culture, expected and embraced by students and their parents. There are clear expectations that children and young people will interact and grow confident with emerging technology whilst at school as well as at home. Educational institutions are also increasingly viewed as part of a competitive marketplace where the ability to provide a student with differentiated social and vocational skills is highly regarded. ICT education and ICT integration can flourish in your classroom or your school with the aid and support of QSITE's experienced educational professionalsQSITE is here to help.
