QSITE GOLD COAST PROFESSIONAL LEARNING, TERM 2 2022

QSITE Gold Coast invites you to attend our next PD Workshop -

Robotics in the Classroom - Getting started and making the most of what you have

Presenter: Dr Damien Kee, technology education expert focusing on Robotics, Programming and Electronics

Over the years many schools have built up a collection of Robotics equipment, other schools are just starting out and looking to see what works best in the classroom.

Come along to this hands-on workshop where participants will have a chance to build and program a robot to use in the classroom. The day will focus on the LEGO Spike Prime robot, but will also demonstrate how similar the programming environment is with other Robotics platforms such as LEGO EV3, VEX IQ, MakeBots etc.

There is no programming experience necessary at all, and by the end participants will walk away with a series of activities they can immediately implement in their classroom.
If you have never played with robots before, and are daunted by opening up a cupboard of Tech you've never seen, or if you're a seasoned Robotics teacher and just want to see what else is out there, then this workshop is for you!

WHEN Saturday 11th June
Registration and morning tea/coffee 9:30am
Workshop10:00am to 2:00pm

WHERE Griffith University, Gold Coast Campus

REGISTRATION: Eventbrite link for registration

COST:
QSITE financial members : $30
